Angus Chang

Full Stack Developer – Providence, RI

Self-taught and passionate learner of web development looking for an opportunity to continue my education and make a meaningful impact on the web.

🗒 Skills

HTML	NodeJS	MongoDB
CSS	ReactJS	Git
JavaScript	ExpressJS	Bootstrap

📄 Experience

Self-Taught Developer – *April 2020 - present*
- Designed and developed databases and servers (CRUD) for web apps.
- Designed and developed responsive front ends using libraries and frameworks such as Bootstrap, Semantic UI and ReactJS
- Use third party libraries to enhance applications and web pages with on scroll animations, flash messages, authentication, authorization, maps and more.

Projects:

YelpCamp – [Heroku](#) | [Github](#)

Description: MEN stack capstone project from Colt Steele's bootcamp. Allows users to view, add and comment on campgrounds. Utilizes third party libraries for flash messages, authentication, authorization, and maps.

Portfolio Template – [Github Pages](#) | [Github](#)

Description: An unpopulated generic version of my own designed and developed portfolio webpage. Uses DOM Manipulation and a third-party library for on scroll animations.

Community Fridge Finder – [Github Pages](#) | [Github](#)

Description: A resource for people to find a community fridge near them to help with food insecurity and food waste. Built with ReactJS, React Router, EmailJS, Framer Motion and Google Maps.
