Angus Chang

Full Stack Developer

Self-taught and passionate learner of web development looking for an opportunity to continue my education and enter the workforce with the necessary tools and perspectives to make a meaningful impact in the industry.

🗒 Skills

HTML	NodeJS	MongoDB
CSS	ReactJS	Git
JavaScript	ExpressJS	Bootstrap

📄 Experience

Self-Taught Developer – *April 2020 - present*
- Built full-stack single page applications using MongoDB, Express, React and Node.
- Built a handful of vanilla JavaScript projects that utilize DOM manipulation, AJAX calls and RESTful routing.
- Use third party libraries to enhance applications and web pages with on scroll animations, flash messages, authentication, authorization, maps and more.

Allume Operations Associate - Dec. 2020 – April 2020
- Manage order throughput for clients, enter data in the internal system and work effectively as a remote team member.

Outdoor Science Teacher - *Jan. 2018 – Sept. 2019*
- Designed science curriculum for 5th grade students, mentored high school volunteers, managed behavior, and conflict among students.

CTLT Student Assistant - Jan. 2014 – Mar. 2017
- Maintained Cal Poly University's Moodle webpages, helped faculty design their online course curriculum and gradebooks.

📚 Education

California Polytechnic State University – *2012 -2017*
B.S Soil Science

PROJECTS:

Yahtzee – Heroku | Github Repo

Description: A variation of Yahtzee built with React. Uses React state and props, JavaScript functions to define the rules and CSS animations.

Yelp Camp – Heroku | Github Repo

Description: MEN stack capstone project from Colt Steele's bootcamp. Allows users to view, add and comment on campgrounds. Utilizes third party libraries for flash messages, authentication, authorization and maps.

Portfolio Template – Github Pages | Github Repo

Description: An unpopulated generic version of my own designed and developed portfolio webpage. Uses DOM Manipulation and a third-party library for on scroll animations.

Infinity Scroll – Codepen

Description: A webpage linked to the Unsplash API that displays photos endlessly as you scroll. Utilizes Fetch API and DOM manipulation.
